Glen Saint Mary • Florida

Group of trees and plants balled and burlapped for shipping from Glen Saint Mary Nurseries

HANDLING TREES AND OTHER PLANTS

Nursery trees and plants are grown in two different ways: in the open ground or in pots, tubs, and boxes. Those grown in pots or tubs are easily handled; if grown in the open ground, they are taken up, either bare-rooted or with earth about the roots. When dug with earth about their roots, they are called Balled and Burlapped.

Pot-Grown Plants

Many different kinds of plants are grown in pots, tubs, or boxes. They may be shipped and transplanted at any time of year and immediate planting effects secured. Usually the pot or tub is removed before shipment, and the earth about the roots is wrapped in paper or burlap.

Bare-Rooted Plants

Plants taken from the open ground with bare roots are usually handled only during the dormant winter season—from November to April. All deciduous trees, as peach, pear, plum, mulberry, dogwood, red-bud, sweet gum, and many more, are examples. Orchards or groves are always planted with bare-rooted trees.

Balled and Burlapped Plants

If the roots of shrubs or trees are very numerous, fine, and fibrous, they hold earth well. They can be dug with the roots in place in the original soil. Burlap is then tied around the ball of earth, or tightly sewn, and the plant should be carefully handled by the ball, rather than the top, so as not to loosen the earth around the roots. The burlap should not be removed when the plant is set out.

Planting and General Care

The land on which trees are to be set should be thoroughly prepared before planting. Too frequently this important matter is neglected or poorly done, but it pays to give particular attention to this part of the work. It is easier to put the land in good condition before planting than after, and, if the trees are to bring the results desired, it must be done at some time.

After the land has been well plowed, harrowed and leveled, a 3- to 4-foot stake should be set where each tree is to stand. The distance apart at which the trees should be set depends on the character of the soil, the moisture it contains, the kind of trees, and the ideas of the planter. Usually they should be given a goodly distance. A table of the usual planting distances is given on the inside back cover.

When the trees arrive, if everything is in readiness, they may be taken directly to the field and set out, taking the trees from the boxes as needed. If the number is large, or there is a delay of more than a few days, it is best to heel-in the trees. From this heeling-in place, they may be taken for planting, and carefully protected from the sun and wind with damp burlap until placed in the holes. Plants or trees should never be allowed to dry out between the time they are taken from the nursery and the time of planting.

It is best to dig the holes just in advance of planting, to prevent drying or baking, also loss of moisture. The holes should be made considerably larger than necessary to accommodate the roots or balls of earth. Set the trees the exact depth they stood in the nursery rows. This can be determined by the "earth collar" marks. If a balled plant, the top of the ball should be at ground-level. It is usually better to set too high than too deep. If bare-rooted, spread out the roots by hand and pack the earth well around them. When the hole is three-quarters full, pack well with the feet. This is important, as more trees are lost from loose packing than any other cause.

After packing thoroughly, and before the hole is filled up, pour in water, especially if the soil is dry. As the water sinks down into the earth it helps to pack the soil in all the small corners among the roots, thus excluding air. When the water has sunk away, fill up the remainder of the hole, pack again with the feet, and level off.

After carefully planting trees or shrubs they should receive such care and attention as will keep them in thrifty growing condition, and, if the best results are desired, they should never be allowed to become stunted in their growth. To bring about this condition they must be cultivated frequently, fertilized from time to time, and kept free from insects and diseases. Only those who give their trees or shrubs the care they require can hope to secure the maximum results from their plantings. Consult your successful neighbors and be guided by their experience under similar conditions.

We are always glad to answer specific questions on fertilizing and spraying.

Glen Saint Mary Nurseries Co. invites customers and friends to visit the nurseries at any time. Almost every day in the year you will find some plant in bloom, but of course there are definite times when the floral display is at its best. In February and March the Azalea display is simply gorgeous; then there is Rose-time when our fields show the Queen of Flowers at her best. The nurseries are 30 miles west of Jacksonville on State Road No. 1.

F O R E W O R D

THIS book marks the fifty-fourth season of our business, and with it we greet our customers, both old and new. We offer it as a representative of our Company, trusting that it will prove helpful and interesting. Especially, we dedicate it to NEW HOME OWNERS—those who have, or are building, new homes. In it they will find much of value in fuller descriptions, new materials, and general information, as well as special planting lists.

From a grower's standpoint, this season has been one of the best for many years. Stocks are in prime condition and of extra-fine quality. Because of the heavy selling

of the past two years the supply of many items is very short. Wholesalers have been ordering great blocks of trees and shrubs during the summer, and we feel that it is due our customers of long standing to advise them that early placing of orders will assure more complete shipments and a wider choice of varieties and sizes.

To make our service complete, we will submit plans for landscaping the home, be it old or new, large or small, simple or elaborate.

Each year we repeat that we are always happy to answer questions, give needed information, and that no order is too small to merit our best attention.

FRUITS FOR SOUTHERN GARDENS

While the South is usually regarded as the home of the citrus and other tropical fruits, there are other deciduous fruits which may be planted to advantage, either in commercial orchards or for home use. Delicious Peaches, Plums, Persimmons, Figs, and Grapes prolong the season of these delectable fruits to include almost the entire year. Pears also may find a place in southern gardens, since new blight-resistant varieties are available. We have all of the best varieties for your selection.

MULBERRIES

For quick, effective shade and an abundance of fruits for birds, chickens, and pigs, no other tree takes the place of the Mulberry about the home. In addition, the fruit is wholesome and abundant. Every farm should have them.

Hicks. Rapid-growing, early-bearing trees, producing good fruits all summer.

Stubbs. A vigorous tree, producing quantities of large, acid, black fruits of best quality.

Townsend. Very vigorous tree, bearing wonderfully fine crops of medium-sized fruits very early in spring.

Prices of Mulberries.	Each	Per 10	Per 100
2 to 3 feet.....	\$0 40	\$3 50	\$30 00
3 to 4 feet.....	50	4 50	40 00
4 to 5 feet.....	65	6 00	50 00
2-year.....	1 00	9 00	80 00

LOQUAT

Eriobotrya japonica

A handsome, large-leaved, medium-sized tree standing several degrees of frost, and a fine ornamental. The yellow, oblong fruit is about as large as a medium-sized plum and has a fine, sub-acid flavor. Tree blooms in November to December, and fruits mature in spring.

Prices of Loquats.	Each	Per 10	Per 100
From seed. Bare roots.			
2 to 3 feet.....	\$0 50	\$4 00	
3 to 4 feet.....	75	6 50	
4 to 6 feet.....	1 00	9 00	

POMEGRANATES

Grown throughout the Lower South. Small trees, producing scarlet flowers and acid fruits used for drinks and jellies. For dry, well-drained soils.

Purple-seeded. Large; thin rind; juice-cells wine-colored; quality best.

Rhoda. Fruit large; rind thin and tough; juice-cells large; juice sweet and of fine flavor.

Wonderful. Large, late sort; fruit of good quality and highly colored.

Rhoda Pomegranate

Terrell Plum

PLUMS

In the Lower South some Japanese-native hybrid Plums are most successful. Of these, Excelsior, McRea, and Terrell are outstanding. Not many of the other Plum types are successful fruiters in the southern sections. Our list is selected from the best.

Excelsior. Introduced by Mr. Taber in 1887. Size medium or larger, round; wine-red; full of juice, and of excellent flavor. The most successful variety we know of for the lower sections of the Southeast.

McRea. Medium size; yellow, overwashed with red; crimson flesh, juicy, excellently flavored. Prolific.

Terrell. Cling. Another fine hybrid, larger than the above; red with small dots and mottlings; flesh greenish yellow, very juicy, and aromatic. One of the best.

Wild. A native wild variety which blooms at the same time as the above, and often aids materially in the production of heavy crops.

We can also furnish trees of Abundance, Burbank, Kelsey, Red June, and Satsuma Plums.

Prices of Plums.	Each	Per 10	Per 100

Red Cattley Guavas

FIGS

Fig trees mature fruits from about June to November in the Lower South, and few fruits are generally better liked. Trees are very productive and the fruit, fresh or preserved, may be used throughout the year. A commercial Fig orchard requires very little care, compared with other fruits.

Black. Medium to large; skin bluish black, almost entirely covered with delicate bluish bloom. Quality good. Strong grower, heavy bearer; hardy.

Brown Turkey. Medium size, short, thick; color coppery brown; flesh amber to pink; quality excellent. Hardy. Fall.

Brunswick. Large, pear-shaped; dark brown; flesh thick, soft, very good. Late.

Celeste. Small to medium; violet color; flesh light to rose at center; juicy, sweet, excellent. Hardy. June, July.

Green Ischia. Medium size, long; rosy flesh, sweet and rich. Good-growing tree.

Lemon. Good size; yellowish green; flesh white, sweet, of fair quality. Early.

Prices of Figs.	Each	Per 10	Per 100
2 to 3 feet.....	\$0 40	\$3 50	\$30 00

4 to 5 feet.....	65	6 00	50 00
1-year.....	1 00	9 00	80 00

GUAVAS

Red Cattley and Yellow Chinese. Similar, except that the fruits are differently colored. Used for jellies and for preserving. Fine, dark, evergreen foliage. Fruits 1 to 1 1/4 inches across. Good in northern Florida and southward.

Prices of Guavas.	Each	Per 10
4-inch pots.....	\$0 40	\$3 50
5-inch pots.....	60	5 00

BANANAS

A rapid-growing, large-foliaged plant that is very decorative and produces quantities of fruit. Requires moist ground and an abundance of plant-food. Best grown in Florida on margins of lakes, banks of streams, and similar places.

Cavendish. Plants rather tender. Fruits excellent.

Hart (Hart's Choice; Lady-Finger). A valuable sort; hardier than Cavendish.

Orinoco (Horse Banana). A strong grower, producing small bunches of fruits.

Prices of Bananas.	Each	Per 10
Large suckers.....	\$0 75	\$6 50

A Banana Planting

GRAPES

That Thrive in the South

All Grapes that grow in the open ground are descended from the wild Grapes of field and forest. By crossing varieties and by selection over a long period of time, we now have varieties that freely yield large, well-filled bunches in both the Muscadine and Bunch Grape classes. We recommend the varieties listed on page 6.

Thomas Grapes

Tane-Nashi
Persimmon

PERSIMMON

The Japan Persimmon is one of the finest fruits which have come to us from the Orient, and is becoming a standard throughout the sections where it can be grown. The fruit is beautiful in appearance, delicious to eat out of hand, and equally so in sherbets, creams, and other frozen delicacies.

In addition to their growing popularity for the home-garden, they are fast getting to be an important commercial crop as the demand from northern markets increases and people become acquainted with the luscious fruit. See page 6 for list of varieties and prices.

Jewel Peaches

PEACHES

Here in the South the climate and soil work together to produce the finest Peaches grown anywhere. From your own garden you get the best Peaches, for the fruit becomes fully ripe on the tree. Peaches can be grown readily in small gardens just as well as in large commercial orchards.

On page 6 we list the varieties that experience has proved to be best adapted to general Southern planting. The area has been divided into four zones, and the approximate time of ripening is given. This plan will help you to select varieties suited to your own locality—for instance, Jewel Peach is adapted to central and southern Florida and tropical climates, and ripens the latter part of May.

Stuart

Moneymaker

Success

PECANS

Because the nuts are so rich in required food-elements and so palatable, the Pecan has become an essential part of fruit orchards for home use throughout the South. In addition, large numbers of commercial plantings have been made, and these are increasing yearly. The varieties of Pecans we list are well tried and favorably known. The trees are vigorous and well grown.

Curtis. Of Florida origin. A beautiful, rapid-growing tree and a heavy bearer of very thin-shelled, medium-sized nuts of highest quality.

Frotscher. A large, oblong nut with very thin shell and of good quality. It is well adapted to planting in the Gulf Coast country, Florida, and southeast Georgia.

Moneymaker. A medium-sized nut with medium shell, well filled with a rich meat. The tree is an upright grower with foliage of dark green color.

Schley. A good growing tree of average form and size. Nuts medium to large, with very thin shell and highest quality meat.

Stuart. A large, strong tree with a fine head. Nuts large, medium thin, good quality. It stands the cold better than most other southern varieties.

Success. Tree sturdy, vigorous, and is a heavy producer of large nuts of average thickness and of good quality.

Prices of Pecans:	Each	Per 10	Per 100
2 to 3 feet.....	\$0 65	\$6 00	\$50 00
3 to 4 feet.....	80	7 50	65 00
4 to 5 feet.....	1 00	9 00	85 00
5 to 6 feet.....	1 25	12 00	110 00
6 to 7 feet.....	1 50	14 00	125 00

Pecan trees succeed on various soils—sandy loam, light clay, or sand and clay are suitable. Low, wet land should be avoided unless it can be well drained; they need moisture like all trees, but detest "wet feet."

THE PECAN and ITS CULTURE

By H. Harold Hume

A thoroughly practical book on Pecan culture. It requires special knowledge to get the most from his trees, and this special knowledge Mr. Hume has furnished in language anyone can understand.

195 pages, cloth bound; price, \$2.00 postpaid.

Celeste Figs. See page 3

FIGS

Wholesome, Nutritious, Healthful

Figs have long been a favorite food in Oriental countries, and great quantities of dried Figs come to the United States.

Every garden can have at least one Fig tree, which ought to be the early-bearing Celeste. If you have a larger place, select two or three later varieties (see page 3). Fig trees grow readily and need only a little attention. Mulching is desirable, as it keeps the soil and roots cool and moist.

Fuyugaki Persimmon

See page 6

EXCELSIOR PLUM

This variety was introduced by Mr. Taber in 1887. Experienced fruit-growers put Excelsior at the top of the Plum list; therefore home-garden owners may expect equally good results. The fruit ripens early in June, is a bright wine-red, 2 inches or more in diameter, with lots of juice and a real Plum flavor. If you like Plums, plant Excelsior. See page 3.

Excelsior Plums. Natural size

See page 3

PEACHES

Next to Citrus, the Peach is, perhaps, prized more highly than any other of the fruits in the South. Our Peach varieties have been very carefully chosen on the basis of every favorable quality possessed by this fancy fruit, and the selections below are adapted to various sections of the South as indicated.

Varieties below that are starred twice are available on *both* Peach and Plum understock. Varieties not starred, on Peach only.

ZONE I. Central and southern Florida; tropical countries.

ZONE II. Eastern north Florida; similar soils and climate.

ZONE III. West Florida, lower Georgia, Alabama, and Mississippi.

ZONE IV. Coastwise Louisiana and Texas.

Ripening-time based on north Florida

****Angel.** (Zone I. June 20-30.) Large; yellow, washed red; juicy, sub-acid, highly flavored. Bears well while young. Late blooming. Free.

Belle of Georgia. (Zones III and IV. July 1-15.) Large; white with red cheek. Very showy. Prolific bearer. Widely planted. Free.

Carman. (Zones III and IV. June 10-20.) Large, shaped like Elberta; creamy white, blushed; juicy. Fine. Prolific. Free.

****Dorothy N.** (Zones I and II. July 5-15.) Seedling of Angel. Very handsome, large, of fine quality. A good bearer of nearly round, yellow-fleshed fruit. Free.

Elberta. (Zones III and IV. July 5-20.) Large; yellow, red-cheeked; finest quality. Most popular sort in the South. Good in west Florida and north.

****Florida Gem.** (Zones I, II, III, IV. July 1-10.) Fruit large, pointed, highly colored; flesh sweet and juicy. One of the best of the Honey strain. Free.

****Hall's Yellow.** (Zones I and II. June 15-25.) Large, nearly round; yellow with red; red at stone. Quality fine. Free.

****Jewel.** (Zones I and II. May 15-25.) Medium to large; highly colored; finest quality. Choicest market sort for Florida. Very prolific and one of our special lines for many years. Free.

****Luttichau.** (Zone II. May 25-June 10.) Another special, and a fine market and table Peach. Large; greenish white, marked with red; juicy, finely flavored. Very excellent. Free.

Mayflower. (Zone III. May.) Medium to large; red, tender, juicy, highly flavored. Prolific. Cling.

****Peen-to.** (Zone I. May 20-June 3.) Curiously formed Peach, flattened at both ends. Greenish white, washed with red. Flavor fine. Among the most tropical Peaches. Cling.

****Suber.** (Zones I and II.) Seedling of Peen-to originated at Lake Helen. Large, firm, quite acid and altogether desirable. Tree vigorous and prolific. Cling.

Taber. (Zones I, II, III, IV. June 15-25.) Excellent canning Peach. Fruit very rich and juicy. Tree prolific. Cling.

****Waldo.** (Zones I and II. May 20-June 3.) Medium size; light yellow with dark red; flesh white, red at stone, juicy, finely flavored. Very prolific. Free.

JAPAN PERSIMMONS

Of the summer to winter fruits cultivated in the South, few are more attractive than Japan Persimmons. The most valuable are included in our list. The fruits are medium to large, sweet, palatable, and the trees should be in all fruit-gardens. Commercial plantings have been profitable, and the fruit-markets of the country have not yet been supplied. These fruits, used fresh, are delicious, and equally so in sherbets, creams, and other frozen mixtures.

Fuyugaki. One of the best. Oblate, medium to large; deep red skin; light flesh, non-astringent, very sweet and may be used while still hard; seedless. Perhaps the very best shipper and keeper. Should be in all plantings. September, October.

Gailey. Small, oblate-conical; dull red; flesh dark about the seeds, firm, juicy. Produces an abundance of staminate flowers for pollinizing other sorts. Valuable in commercial and home orchards.

Hachiya. Very large and showy; brilliant red skin; sweet, deep yellow flesh, astringent until ripe.

Okame. Large, oblate; orange-yellow to carmine skin; flesh light and non-astringent when ripe, light brown around seeds, quality fine. Midseason to late.

Tane-Nashi. Large to very large, roundish conical, very attractive; skin light yellow, changing to bright red; flesh yellow, of finest quality; seedless. Prolific, bearing quite young. The finest commercial sort and most popular for home use.

Triumph. Medium size, tomato-shaped; skin red; flesh yellow, with a few seeds, finest quality. Midseason to very late.

Prices of Persimmons.

2-year.....	1 00	9 00	80 00

We can also furnish trees of Hyakume, Ormond, Taber's No. 23, Tamopan, and Tsuru varieties. Season, early to December.

Hood Pear

GRAPES

The group of Muscadine Grapes is well and favorably known throughout the East and Southeast. For the Southeast, in particular, many sorts of the Bunch Grapes do not seem to be well adapted, but of those which are successful here we have long produced and distributed the following list:

MUSCADINE GRAPES

Flowers. Large, purplish fruit; sweet, excellent. August, September.

James. Largest of this group. Black; juicy, and of excellent quality. Prolific. August to late fall.

Scuppernong. The old, popular sort, known and liked for its delicious, musky flavor. Fruit large, bronze-colored; flesh excellent and juicy. Season August, September.

Thomas. One of the best and most popular Grapes. Reddish purple; pulp sweet and tender. August, September.

Also, we can furnish the Wild Muscadine to pollinate the flowers of the other sorts. This often increases the crop.

BUNCH GRAPES

Beacon. A strong grower whose fruits ripen early. Fruit black, of good quality, produced abundantly in large bunches.

Carman. Fruit large, black, of very fine quality; skin tough, thin; borne in large clusters. Popular in the South.

Concord. An excellent variety that is well known and widely successful. Fruit large, blue-black; flesh sweet and tender. Vigorous and a regular and heavy bearer.

Delaware. Small fruits of best quality; skin red or pink, and thin; borne in medium-sized bunches. One of America's fancy Grapes.

Ives. A good grower; very productive. Bunches and fruits large. Very fine early black variety.

Niagara. Strong grower; prolific. Bunch and fruit large. A fine-quality greenish yellow Grape.

We can also furnish the Diamond and Waupanuka varieties.

Prices of Grapes.	Each	Per 10	Per 100

PEARS

Every home-garden should have a few Pear trees to supply luscious, juicy fruit for the table as well as dependable cooking varieties. In spring the trees are a cloud of white blossoms.

Hood. Blight-resisting. Large, yellowish green fruit, with white flesh, very juicy, mellow, free from grit, and deliciously flavored. Excellent for every use to which Pears are put. Season June to July.

Kieffer. Large; yellow with reddish cheek; handsome and very juicy. Good flavor when fully ripe. September, October.

Le Conte. Large, pyriform; smooth; pale yellow. Quality good when properly ripened. A dessert Pear. July.

Pineapple. Blight-resisting. Large and handsome, with a pleasing odor when ripe. Being blight-resistant, with Hood makes the best Pear combination orchard of which we know. Flesh coarse but juicy. Season July, August.

Citrus Fruits

In Florida, Citrus Fruits lead all others in importance. Large acreages are grown along the Gulf Coast from eastern Florida into Texas. Groves are being increased; new and improved sorts are being introduced which are adapted to the climatic and other conditions of this area. Families may enjoy these fine fruits along with an abundance of other kinds. The distinctive healthfulness of Oranges and Grapefruit makes it necessary that a place be provided for them in all home orchards. Our Citrus varieties are the best known, and their superior qualities are established. Our trees are vigorous and are heavy producers of juicy, well-flavored fruits.

Marsh Seedless Grapefruit

Citrus Fruits at Glen Saint Mary on Citrus Trifoliata Stock

ORANGES

Hamlin. An excellent, extra-early sweet Orange of fine quality; very juicy and delicious.

Lue Gim Gong. Large, fine, heavy, very late, smooth fruit with few seeds, and of highest quality. Tree cold-resistant.

Parson Brown. An old, fine, early variety of high quality and medium size. Cold-resistant.

Pineapple. The favorite of all midseason Oranges. A heavy producer. Trees upright, with large fruiting heads.

SATSUMAS. We have three distinct varieties of this Mandarin type, extra-early, hardy Orange (Owari, Silverhill, Kawano Wase). Fruits are medium to large, orange to deep orange in color, sweet, and highly flavored. We consider it the most palatable of Citrus Fruits, and one of the very best market sorts.

Satsuma Owari. Large, flattened; deep orange, with smooth rind, which parts freely from the pulp; seedless, or nearly so. Matures before any of the round Oranges. Trees vigorous and hardy.

Satsuma Silverhill. Tree is an upright grower, apparently harder than Owari. Fruit similar to the latter, holding on trees perhaps a little longer in good condition. Otherwise similar.

Satsuma Kawano Wase. Tree and fruit similar to Owari. Fruit two weeks earlier, ripening before coloring. Smooth, thin rind; very little "rag." Well worth cultivating.

Temple. The very highest of Citrus-Fruit qualities are found in this peerless Orange. It is strictly a "fancy" fruit from every quality point. Fruits large; fine, deep orange skin, separating easily from the pulp; free from "rag"; juicy, delicious. Tree a vigorous grower, bearing freely when very young. Everywhere that the round Orange varieties can be grown, home orchards should have at least a few Temples.

Tangerine (Dancy). A "kid-glove" Orange of medium size, deep orange color, and rich, spicy flavor. Trees upright, dense, heavy bearing.

Valencia. (Late.) Long the most famous late Orange in the Citrus industry. Tree a strong grower, a fine, early bearer, and perhaps the most profitable of the round

Orange group. Fruit keeps well on trees until very late. Size medium; good color; finest quality.

Washington Navel. A very large, midseason Orange of excellent quality, and a good bearer on *C. trifoliata* stock. It should be included in home orchards.

GRAPEFRUIT

Duncan. One of the very best for all uses, lacking nothing required for the table and for market. Of good quality; very juicy. Hardest of all the Grapefruits. Season December to May.

Foster. Flesh purplish pink. Very early and of excellent quality. One of the best and most attractive.

Marsh Seedless. A practically seedless variety which can be held on the trees very late. Fine-quality fruit with smooth yellow skin. It bears heavy and regular crops.

OTHER CITRUS FRUITS

Meyer Lemon. Perhaps the hardest of the Lemon varieties. An excellent bearer of large fruits of high acidity. Particularly valuable in central to north Florida and warmer Gulf Coast areas.

Calamondin. A small Citrus Fruit 1 1/4 inches in diameter, of orange-red color, somewhat flattened; skin thin, easily removed from the pulp; sections separated as in the Mandarin oranges, juice clear and strongly acid. Makes a pleasant drink. Very productive. Season November, December.

Eustis Limequat. New, attractive, acid Citrus—a cross of a lime with Nagami kumquat. Tree is vigorous, producing quickly fine crops of acid fruits which make an excellent drink. Fruit oblong, somewhat larger than the Key lime; rind thin, grapefruit color. Hardy farther north than limes and most lemon varieties. A very important addition to our list of Citrus Fruits, whether for market or home use.

Glen Citrangedin. A hybrid between the Willits citrange and the calamondin. Very hardy; has withstood temperatures as low as 12 degrees F. without serious injury. Fruit small, resembles calamondin; excellent for making a drink which can scarcely be distinguished from limeade. It is, perhaps, the best of the truly hardy "ade" fruits that will serve as acceptable substitutes for the lime or the lemon.

KUMQUATS

Marumi. Tree dwarf, compact, globular. Foliage small, thickly placed. Fruit 3/4 to 1 inch long, round; golden yellow; rind thin; sweet, well flavored; juice and pulp aromatic. Ornamental.

Meiwa. More vigorous than Marumi; well foliaged and handsome. Fruit about 1 to 1 1/4 inches long, round; pulp sweet when ripe. The best Kumquat for eating fresh.

Nagami. Vigorous; broadly upright; handsome. A very heavy bearer of golden yellow, oblong fruits 1 1/2 to 2 inches long; rind sweet; pulp and juice finely flavored. Tree forms a nice head, more open than Marumi.

Citrus Fruits in Tubs

We carry a number of varieties. Prices and information on request.

Citrus Fruit Trees on Sour Orange Stock at our Winter Haven Nurseries, Winter Haven, Fla.

Oranges. Hamlin, King, Lue Gim Gong, Parson Brown, Pineapple, Ruby, Tangerine, Temple, Valencia, Washington Navel.

Grapefruit. Duncan, Foster, Marsh Seedless, McCarty, Thompson (Pink Marsh Seedless), Triumph.

Lemons. Meyer, Ponderosa, Villa Franca.

Other Citrus. Mandarin, Tangelo.

On Rough Lemon Stock

Oranges. Hamlin, King, Lue Gim Gong, Parson Brown, Pineapple, Tangerine, Valencia. *We have Temple on Cleopatra stock.*

Grapefruit. Duncan, Foster, Marsh Seedless, McCarty, Thompson (Pink Marsh Seedless), Triumph.

Lemon. Meyer, Ponderosa, Villa Franca.

Lime. Tahiti.

Kumquats. Marumi, Meiwa, Nagami.

Other Citrus. Calamondin, Mandarin, Tangelo.

2-year.....	1 40	12 50

Temple
Orange

TEMPLE ORANGE

A "fancy" Orange of the highest quality which should be in every home orchard where round Oranges can be grown. The fruits are large, with a deep orange skin which separates easily from the pulp and can be sold as one of the so-called "Kid Glove" Oranges. The pulp is free from "rag," very juicy, with a delicious, spicy, rich vinous flavor. There are about 20 seeds. The tree is a vigorous grower, bearing freely when very young. See page 7 for sizes and prices.

LIMEQUATS

Limequats might be called "little lemons" on account of the size and appearance of the fruit. The plant grows 8 to 12 feet high, is somewhat spreading, and has the usual glossy green foliage of Citrus trees. The fruit is about 2 inches in diameter, bright yellow, and a mature plant is heavily loaded. The flavor is sharply acid and used chiefly in making "ades" and similar drinks. See page 7 for sizes and prices.

Eustis Limequats

Owari Satsuma Oranges

OWARI SATSUMA

About 1885 we secured a lot of bud-wood from Fruitland Park. Groves planted with trees from this stock became noted for the high-quality fruit produced. This quality was so pronounced that an investigation was made by Dr. Tanaka and Mr. Scott, who decided that the trees were the pure Japanese Owari strain.

Our records show it has withstood 15 degrees (Fahr.) without injury, when budded on *Citrus trifoliata*—the only understock adapted to it. Trees are heavy bearers and produce profitable crops over the entire Satsuma-growing territory. See page 7 for sizes and prices.

Nagami Kumquats

DUNCAN GRAPEFRUIT

One of the finest Grapefruits grown, desirable in every way. The fruit grades 54's to 70's, the size the market wants. In color it is a clear light yellow and the unusually heavy juice content has the true sweet-bitter-acid Grapefruit flavor. It is ripe enough to ship in December but can be held on the tree without deterioration until late in May. Duncan is unquestionably the hardiest of all Grapefruits. See page 7 for sizes and prices.

NAGAMI KUMQUAT

Ornamental and useful applies directly to both Kumquats and Limequats. The plants are small, seldom growing more than 12 feet tall, with a spread of branches about equal to the height. The foliage is bright, dark green, and is as handsome as that of any other evergreen shrub. Both Kumquats and Limequats are hardy, even as hardy as the Satsuma Oranges.

The fruit of the Kumquat is small, varying from an inch to 2 inches long, begins to ripen in mid-November, and is used chiefly for marmalades and jellies. See page 7 for sizes and prices.

HAMLIN ORANGE

An ideal Orange maturing the latter part of September and early October. The fruit is clear golden yellow, tinged with deep orange-red, deepening if it is allowed to remain on the tree until full maturity. Its flesh is melting, very juicy, with real delicious Orange flavor, and is practically seedless. A few fruits have 2 or 3 seeds but most of them none at all. A medium-sized Orange and an excellent shipper. See page 7 for sizes and prices.

Hamlin Oranges

SHRUBS AND HEDGE PLANTS

The entire South has many shrubs that supply color from spring to fall, but Florida and the Gulf Coast regions are especially blessed in the large number of varieties that thrive in this territory. Many that are only moderately successful a few hundred miles north grow and bloom freely in the Lower South. From the different varieties here noted you will be able to select flowering shrubs that will give color nearly every month in the year. If you are not certain about the selection, tell us your general location and we shall be glad to assist you in making a suitable choice of shrubs for year-round color.

Ardisia crenulata

ABELIA grandiflora. One of our very best evergreen shrubs for foundation plantings, corner groups, single specimens, or ornamental hedges. The small leaves are bright, glossy green, and cover the plant the greater part of the year. The flowers come in early May and the plant seems to be covered with bloom until late autumn. Plants can be pruned in any shape desired. Entirely hardy as far north as Philadelphia, and thrives to perfection all over the Southern states.

6-inch pots.....	75	6 50

Malvaviscus grandiflora

Bottle Brush

BOTTLE BRUSH

Callistemon rigidus

In April this plant produces long, cylindrical, brush-like flower-spikes which give it the name of "Bottle Brush." Its small flowers are bright red and very showy. The evergreen foliage is narrow and dark green. Hardy in northern Florida and southward.

	Each	Per 10
4-inch pots...	\$0 50	\$4 50
6-inch pots...	75	6 50

CRAPE MYRTLE (*Lagerstroemia indica*)

Among the most important tall shrubs for the South, and as valuable here as the famed lilac is to the North. A vigorous, well-grown plant will grow 15 to 20 feet high and be an immense bouquet of flowers in spring and early summer. Hardy and grows well in almost any place.

Prices of all varieties.	Each	Per 10	Each	Per 10
2 to 3 feet	\$0 50	\$4 00	5 to 7 feet	\$1 00
3 to 5 feet	75	6 00	Special	4 50 and up.

Purple. Very showy clusters of rich purple flowers.

Rose. A favorite because of the deep old-rose color.

Crimson-Pink. Bright and showy; large clusters of crinkled flowers.

White. Best planted with other varieties, or shrubs of contrasting color.

STANDARDS OR TREE FORMS OF CRAPE MYRTLE

Many flowering shrubs make effective Standards, and this is especially true of Crape Myrtle. We have some very fine Standards.

Standards, Balled & Burlapped.

4 to 5 feet (Crimson-Pink only)	4 00
5 to 7 feet (Crimson-Pink only)	6 00
7 to 10 feet (boxed roots) White, Purple, and Rose.	15 00

Lagerstroemia indica (Crape Myrtle)

Buddleia, the attractive Butterfly Bush

BUDDLEIA

These attractive, quick-growing evergreen plants are among the most satisfactory of our flowering shrubs. There are hardy varieties among this family, but the varieties we list, and which have finer flowers than the hardy ones, are natives of eastern Asia and are not hardy north.

The fragrant flowers are produced in spikes or terminal racemes somewhat resembling lilacs and range in color from the pure white of Asiatica to the purplish violet of Lindleyana. They attract butterflies more than any other flower and it is from this fact that the plants derive their common name of Butterfly Bush.

The Buddleias thrive in rich, well-drained soil in a sunny location. Their blooming period is unusually long; some of them after blooming all summer will, unless checked by cold weather, bloom right through the winter. The flower-heads are fine for cutting. For varieties and prices, see page 10.

Magnolia stellata

MAGNOLIA STELLATA

The Star Magnolia is a grand plant which rarely grows over 10 to 12 feet tall, but it is quite bushy, and when covered with its pure white, starry flowers, some 3 inches in diameter, it is one of the loveliest of a lovely family. There are just enough of the star-shaped petals to make it appear semi-double. It has a mild but pleasing fragrance. For prices see page 11.

OLEANDER (*Nerium oleander*)

Evergreen shrubs which are eminently adapted to all of Florida and the Gulf Coast region. The brilliantly colored flowers, which are produced very freely, make the Oleanders one of the most showy plants grown in the Southern territory. The leaves are long, narrow, pointed, bright green. When used in groups or in hedges the Oleanders are a valuable addition to any lawn. Particularly are they adapted to seashore planting and other exposed places.

Cardinal. Deep red.	Pink. Single blooms.
Mme. Peyre. Shell-pink.	Pink. Double flowers.
Mrs. Roeding. Salmon.	Red. Double; large blooms.
Shell-Pink. Very dainty.	White. Single.

Prices of all varieties.		Each	Per 10
Bare-rooted. 2 to 3 feet.....		\$0 40	\$3 50
3 to 4 feet.....		55	5 00
4 to 5 feet.....		75	6 50
Spade-balled. 2 to 3 feet.....		75	6 50
3 to 4 feet.....		1 00	9 00
4 to 5 feet.....		1 50	12 50
5 to 7 feet.....		2 50	22 50

Oleander

MAGNOLIA SOULANGEANA

This hybrid variety is one of the hardiest of the family and beautifies Northern as well as Southern gardens. The large, eup-shaped flowers are white within, rosy purplish without, and appear before the foliage. It develops into a good-sized tree and is a glorious spectacle when in full bloom. For prices, see page 11.

SHRUBS AND HEDGE PLANTS, continued

Hedge of *Pittosporum tobira*

PITTOSPORUM tobira. Hardy. Foliage dark green and shiny. Splendid for foundations and hedges. Can be pruned to any desired shape. Does well in full sun and is one of the finest evergreens for shady places and for seaside planting.

tobira variegatum. Foliage variegated light green and white.

GRASSES AND GROUND-COVERS

The most important grasses suitable for Southern lawns are offered here. Best lawns are grown from cuttings planted in spring and summer.

Bermuda Grass (*Cynodon dactylon*). A favorite for lawn purposes in the Lower South. Cuttings, \$1.50 per bus.

Carpet Grass (*Axonopus compressus*). A valuable lawn grass coming into general use. It resembles St. Augustine Grass and retains its color well in cool weather. Cuttings, \$1.50 per bus.

Centipede Grass (*Eremochloa ophiuroides*). A fine lawn and pasture grass, thoroughly tested at the Florida Experiment Station. Withstands drought. Cuttings, \$1.50 per bus.; \$1.25 per bus. in 5-bus. lots.

Liriope. Dark green, grass-like foliage 6 to 8 inches long. Spikes of lavender flowers like grape hyacinths. 25 cts. each, \$2 for 10.

Ophiopogon japonicus. A grass-like plant about 6 inches high which spreads rapidly by underground stems. Small clumps, 50 cts. for 10; medium clumps, \$1.50 for 10; large clumps, 25 cts. each, \$2 for 10.

Pampas Grass (*Cortaderia argentea*). Fine, handsome clumps 6 to 8 feet high. Very ornamental for screens and individual specimens. Small clumps, 75 cts. each, \$6 for 10; strong clumps, \$1 each, \$9 for 10; extra-strong clumps, \$2 and up.

St. Augustine Grass (*Stenotaphrum secundatum*). A broad-leaved grass excellent for shady locations. May be grown close to salt water. Spreads rapidly. Cuttings, \$2 per bus.

TEA PLANT (*Camellia thea*). Leaves dark green. Flowers white and fragrant. Fine for moist, shady places. Hardy. Evergreen.

Balled & Burlapped.	Each	Per 10

2 to 3 feet.....	1 00	8 00
3 to 4 feet.....	1 50	12 50

TECOMA capensis. This strong-growing evergreen plant may be grown as either a shrub or a climber. Flowers bright scarlet in summer. Adapted to central and south Florida.

4-inch pots.....	50	4 50
------------------	----	------

THUNBERGIA erecta. Handsome, densely branched, evergreen shrub. Adapted to south Florida and for pot-culture farther north. Flowers blue-purple, with deep yellow throats. Foliage dark green.

erecta alba. Same as the variety above except the flowers are white.

Prices of both varieties.		
4-inch pots.....	50	4 50
6-inch pots.....	75	6 50

VIBURNUMS. The Viburnums offered below are all evergreen shrubs with white, sweet-scented flowers. They have proved to be desirable garden shrubs for the South.

macrophyllum. Upright grower with shiny leaves.

odoratissimum. A vigorous grower; compact-spreading.

suspensum. Low and spreading; free bloomer.

tinus (*Laurestinus*). An evergreen flowering shrub from the Mediterranean region. When full grown the 10-foot bush, covered with creamy white flowers, is a February joy. For specimens or hedges.

Prices of all varieties.

Centipede Grass Lawn

Ligustrum nepalense

LIGUSTRUM

A FINE family of shrubs deserving a great deal more popularity than it now has. Because the Privets are such important hedge plants, too many of us think of them only in that connection and lose sight of the fact that there are many varieties which, grown as specimens, are as desirable shrubs as their better advertised cousins. An important feature of this group is that they are not particular as to soil and will thrive where many plants would starve. In these days of a scarcity of manure this is a thought for the gardener to consider.

Mostly natives of Asia and the Mediterranean region, they are, of course, not all hardy North but all do thrive throughout the South and some, like the beautiful *L. lucidum*, develop into glorious specimens furnishing not only pleasing flowers but great crops of unusually attractive fruit.

Among the Privets will be found some of our most beautiful foliage plants, foliage so waxy and polished that it hardly seems possible that it can be real.

Coriaceum. A dwarf, hardy variety, with small, extremely dark, crinkled leaves. Very ornamental. A handsome variety of Japonicum discovered in Japanese gardens.

Balled & Burlapped.	Each	Per 10
12 to 18 inches.	\$1 00	\$9 00
18 to 24 inches.	1 50	12 50
2 to 3 feet.	2 00	17 50

Iwata. Dwarf variety with small, rounded leaves, mottled yellow. Very bushy and compact. Satisfactory for foundation planting.

Lucidum. The finest of all Ligustrums. Very bushy, compact-spreading, with rich, dark waxy leaves and panicles of white flowers followed by large bunches of black berries loved by the birds. It is almost indispensable for foundation plantings and is also fine for hedges and as individual specimens. Can be pruned to any desired size or shape or allowed to develop into a splendid small tree.

Excelsum superbum. A rapid grower with brightly colored leaves, variegated green and white. Very showy.

Gracilis. A graceful, upright grower, with dark green foliage.

Japonicum. Strong, upright grower, with large green leaves often with reddish margin. Creamy white flowers in loose panicles followed by bluish black berries. Should be used only where height is desired.

Aurea-marginatum. A strong, upright grower, similar to Japonicum, but the leaves are margined with yellow or gold. Makes an attractive specimen plant where something different is desired.

Nepalense. An evergreen shrub with 5-inch leaves and quite large flowers in broad panicles in July and August. Not hardy North.

Nobilis. Similar to Lucidum, except it is an upright grower. Very desirable for corners and other situations where a taller plant than Lucidum is required.

Prices of the six preceding varieties.

Japanese Privet (*Ligustrum lucidum*)

Grafted Ligustrums

A limited quantity of grafted plants will be available this season. The scions are cut from the best plants in our fields, selected for both foliage and form. Write for details and prices.

Ligustrum japonicum

THE gayest of all the flowering plants the Orient has given us are the Azaleas. We wish that all of our friends could see our planting of Azaleas at GLEN SAINT MARY; they are so marvelous that rarely does a visitor find words to express his admiration and delight. No photograph or painting can begin to portray the brilliance, the vividness of the coloring of these glorious flowers.

THE GLEN SAINT MARY Azaleas are usually at the height of their beauty in February and March, and we cordially invite visitors to come and enjoy the flowers with us. Azalea lovers will find many rare varieties, including a number of our own originations; those who do not know Azaleas will find another joy to add to their garden pleasures.

AZALEAS

DURING Azalea blooming-time, which is in February and March, Southern gardens are a riot of color. There are blooms of the palest pink and the most brilliant scarlet; there are shades of red, even to the deepest crimson, and vivid tones of flame and orange; there are soft lavenders and pure whites that intensify the colors of their neighbors.

Azaleas are easily transplanted and grow readily, provided certain requirements are met. The plants should have an acid soil, either natural muck added to the neutral soil or woods-mold secured from beneath hardwood trees.

INDIAN AZALEAS

Azalea indica

The Indian Azaleas are evergreen shrubs with large single or double flowers which sometimes measure 4 inches across. Some varieties are slow-growing, practically dwarf, while others grow rapidly into large shrubs. The colors are varied and very beautiful.

The famous Azalea Gardens of the South such as Magnolia Gardens and Middleton Place are rich in varieties of the Indian Azaleas.

RED and DEEP PINK

Brilliant. Early to midseason. Compact, bushy plants with small leaves. Free bloomer, bearing flowers of a deep rose-pink.

Clear Dark Pink. Late. A hardy, compact, free-flowering bush with fine foliage.

Double Dark Pink. Midseason. Compact grower. Hardy.

Henri LeFever. Late. Good foliage; medium-sized leaf. Compact grower. Salmon-pink flowers with fluted petals.

Præstantissima. Late. A semi-hardy, compact, bushy grower with good foliage. Free flowering.

Pride of Dorking. Late. A good grower, open and hardy; free flowering.

Prince of Wales. Rather late. Hardy, bushy, compact grower; free flowering.

LIGHT PINK

Croemina. Midseason. Hardy, rather bushy plant with good foliage; free flowering.

Elegans. Early. A hardy, fast grower, of rather open habit, with good foliage. Free flowering and easy to grow. Flowers medium size.

Elegans Superba (Pride of Mobile). Midseason. Similar to Elegans but more compact in growth and larger flowers.

George Franc. Early. A hardy, bushy grower. One of the earliest to bloom, bearing its large flowers in profusion.

Macrantha. Very late. A hardy, summer-blooming type; bushy, compact grower.

Mme. Frye. Late. Hardy, bushy, compact plant with small, shiny leaves; free flowering.

Miltoni. Late. A hardy, dwarf variety.

ORANGE

Coccinea Major. Midseason. Hardy, upright, open growth, with good foliage; free flowering. Blooms of medium size.

Glory of Sunninghill. Late. A hardy, bushy, compact grower with good foliage; free bloomer. Flowers of medium size. One of the best in this color.

Maximilian. Flowers orange in color, ruffled at the edges, produced late in season. A bushy grower and hardy.

Macrantha. Very late. Hardy, bushy type; good foliage. Medium-sized flowers.

Orange. Late. Midseason. Hardy, compact grower with good foliage.

After the bed has been prepared, the addition of one-fourth to one-half pound of aluminum sulphate per square yard, well raked in, will keep the soil in proper condition. Azaleas do not prosper in dense shade, but may be shaded for a portion of the day. Good drainage is also needed. During hot, dry weather they should be watered or syringed frequently.

Azaleas may be used as specimen or accent plants, set in foundation plantings, in the shrub border or in beds by themselves. They may be grown successfully from Charleston, S. C., down the coast to central Florida and around the Gulf Coast to Texas.

Pluto. Midseason. Slow, compact grower; good foliage. Hardy.

Prince of Orange. Midseason. Compact grower; free flowering. The good-sized flowers are well mixed through the luxuriant foliage. Hardy.

President Clay. Early. Plant tall, open grower; free flowering. Medium-sized flowers. Hardy.

Sublanceolata. Late. Tall, open-growing, hardy plant with large leaves. Flowers very large and extremely showy.

LAVENDER

Concinna. Midseason. Strong, open-growing variety; rosy lavender-lilac flowers.

Formosa. Midseason. A robust, strong-growing Azalea with good foliage and very large flowers of lavender-lilac. Hardy and one of the easiest to grow.

Omurasaki. Midseason. Hardy, strong-growing, with flowers of rose-lavender.

Phœnicea. Early. Somewhat like Formosa, but having narrower petals, also slower and more compact in growth.

Violacea Rubra. Midseason. Deep violet flowers with wavy petals. Strong growing, and one of the best in its color.

SALMON

Dixie. Midseason. A strong-growing, hardy, bushy type. Flowers salmon, with lavender splotch.

Duc de Rohan. Early. A semi-hardy, bushy, compact grower; very free flowering. Blooms of medium size.

Duke of Wellington. Rosy salmon with dark center. Flowers produced in abundance in midseason. Desirable.

Frederick the Great. Late. Hardy, bushy, compact growth; very free flowering.

Lawsal. Midseason. Hardy, rather bushy growth; flowers profusely. One of the best in its color.

Nora Lee. Late. A bushy, low, compact Azalea with clear salmon flowers. Free blooming.

William Bull. Late. Hardy, open-growing variety that is fine for pools or reflection work; free flowering. Rather small, double flowers like roses. Unique.

WHITE

Deutsch Perle. Early. A hardy, double white variety.

Fielder's White. Early. Large, pure white flowers. Hardy, strong, upright grower; free blooming. Best foliage of the whites.

Flag of Truce. Midseason. Hardy, rather compact, bushy grower; very free blooming. Double flowers.

Latana Alba. Late. Good-sized, pure white flowers. Hardy, dwarf, bushy grower.

New White. Early. A hardy, bushy grower with deeper green foliage than Fielder's and smaller flowers.

Azalea Lath House

INDIAN AZALEAS
VARIEGATED

Anthonon. Late. Fast grower. Full foliage. Flowers white with soft rose. Hardy.
Cavendishi. Late. Very hardy, bushy type. Large white flower with red throat.
Cerces. Late. Compact grower; free flowering. Pink and white blooms. Good foliage. Hardy.
Iveryana. Late. Low, compact grower, with good green foliage and large white flowers with pink stripe. Hardy.
Vervaine. Late. Tall, open grower; free flowering. White blooms with red throat. Hardy.
Vittata Fortunei. Early. A hardy, tall, open grower; very free blooming. Medium-sized, lavender and white flowers. Earliest and longest blooming variety.

KURUME AZALEAS

Azalea obtusa japonica

Kurume Azaleas are compact, free-flowering bushes of the same type as the familiar Amoena to which they are closely related. The colors are brilliant and various and the flowers are single, hose-in-hose or double.

RED and DEEP PINK

Benigiri. Midseason. Single flowers of deep red. Compact grower with rather narrow leaves. Hardy.
Christmas Cheer. Midseason. Free producer of hose-in-hose type flowers of a good Christmas-red color. Compact; deep green foliage. Hardy.
Hexe. Midseason. Flowers hose-in-hose type, large for this group, of a deep red color. Low, dense grower. One of the best.
Hinodegiri. See page 20.
Morning Glow. Like Sunstar, but a shade lighter.
Sunstar. Single, medium-sized blooms produced for a long period. Rather open growing and hardy.

Azalea amoena

Azalea Planting

LIGHT PINK

Apple Blossom. Late. Flowers a beautiful shade of pink, resembling apple blossoms, with lighter shadings toward the centers. Foliage glossy green. A compact grower; hardy.
Cherry Blossom. Early. Dainty hose-in-hose flowers of light pink, shading lighter toward centers. Large green foliage. Hardy.
Coral Bells. Midseason. Dainty, beautiful, shell-pink flowers, shading deeper at the centers, and produced in profusion. Hose-in-hose. Foliage small, rounded, glossy. A compact grower. Illustrated on page 20.
Daybreak. Midseason. Very free flowering. Large clusters of single, shell-pink blossoms. Good green foliage. A compact grower.
Exquisite. Early. Beautiful, large salmon-pink flowers of hose-in-hose type. Rather a bushy grower with good green foliage.
Fairy. (Kurume.) Flowers single, produced in clusters, about the same color as Pink Pearl, which it resembles, but is a more compact grower. Very satisfactory.
Hortensia. Midseason. Soft pink, hose-in-hose flowers in dense clusters. A compact grower.
Mountain Laurel. Midseason. White, shaded with pink, like mountain laurel. Good dark green foliage. Hardy.
Peachblow. Early. Single flowers of a beautiful shade of peach-pink, and having ruffled edges. Hardy and very desirable.

ORANGE

Flame. Midseason. Flowers medium size, single, madder-red, suffused with copper. Very showy. Good foliage. An open grower.
Flamingo. Midseason. Rather large, single, salmon-red flowers with dark blotch. A medium bushy grower.
Vesuvius. Midseason. Single, orange-red flowers of medium size. Foliage dark glossy green. Rather compact growth; free flowering.

LAVENDER

Fujimoyo. Midseason. Delicate lavender, single flowers. Compact grower with good foliage.
Lavender Queen. Early. Light lavender. Free flowering, with luxuriant foliage.

SALMON

Bridesmaid. Early. Bright salmon flowers in large clusters. Free flowering. The foliage is small and glossy green.
Pink Pearl. Early. Beautiful salmon, hose-in-hose flowers, produced in large clusters. Very free flowering and a bushy grower.
Salmon Beauty. Midseason. Large hose-in-hose flowers; free blooming. Foliage light green.
Salmon Prince. Midseason. Large, single, pure salmon flowers in rhododendron-like clusters. Rather compact grower.

WHITE

Ramontacea. Midseason. Pure white; single. Very free flowering. Strong, upright grower with good light green foliage.
Snow. Midseason. Very free flowering. Pure snow-white; hose-in-hose type. Compact foliage of glossy green color.

NATIVE AZALEAS

The native Azaleas, commonly called "Wild Honeysuckles" in the South, are all deciduous shrubs. The two species native in Florida are carried in stock—*Azalea austrina* and *A. canescens*.

Azalea austrina (Florida Flame Azalea). This beautiful Azalea, native in northwestern Florida, blooms in March and April. The spicy-scented flowers vary in color from light yellow through orange to orange-red. Plants grow to a height of 8 to 10 feet.

Azalea canescens (Native Azalea; Wild Honeysuckle). The most common of the native Azaleas and is found throughout northern Florida and southern Georgia, growing on moist, but well-drained acid soil. The trumpet-shaped flowers are usually light pink in color, but white-flowered and deep pink specimens are sometimes found. They grow to large size, but are readily kept at any desired size by pruning. The blooming season is in February and March. Illustrated on page 20.

Prices of Native Azaleas.	Each	Per 10
Small clumps, 2 to 3 ft.....	\$1 25	\$10 00
Medium clumps, 3 to 4 ft.....	2 00	17 50
Strong clumps, 4 to 6 ft.....	4 00	37 50

Azalea canescens

AZALEA CANESCENS

This native Azalea, known locally as Wild Honeysuckle, is found throughout northern Florida and southern Georgia in moist but well-drained acid soil. The flowers are light pink, with occasional white or deep pink specimens. Blooms in February and March. For prices, see page 19.

AZALEA CORAL BELLS

A popular shell-pink variety of Kurume Azaleas that comes into full flower in the middle of the Azalea season. The blooms are of the hose-in-hose type, and show a deeper shade of pink at the center. The plant is compact in habit, with small, glossy leaves, and when in full bloom is literally a mass of color. We are sure you will like Coral Bells. The varying sizes and prices are given on page 19, with the general list of Kurume Azaleas.

Azalea hinodegiri

AZALEA HINODEGIRI

This is one of the most brilliant of all the dwarf Azaleas, and is a profuse bloomer over a long period. It is a shapely plant, with round, evergreen foliage, and quite dwarf in growth, making a fine pot-plant, or an ideal low hedge. The flowers are vivid rosy scarlet.

12 to 18-inch spread.....	1 25	10 00

Azalea, Coral Bells

Ilex opaca

AMERICAN HOLLY

Ilex opaca

This is the Holly that makes our homes bright with its glossy foliage and red berries during the holiday season. All the Holly trees that we offer are grafted from selected, fruit-bearing specimens.

During the past few years we have collected or evolved several variations of Ilex. Some have nearly smooth leaves while others have orange berries. We shall be glad to give further information on request. See page 22 for prices.

Red-Bud

RED-BUD

Cercis canadensis

The American Red-Bud or Judas Tree is a small, nicely shaped, deciduous tree with rounded leaves and produces an abundance of rosy pink flowers in early spring. As the flowers appear before the foliage, a Red-Bud in full flower is one of the loveliest of spring's pictures.

Balled & Burlapped, double above rates.

Magnolia grandiflora

If you have available space, by all means have a garden of Azaleas. Their wonderful colors are not surpassed by any flowering shrubs, and when growing in happy surroundings they are numbered among the most valued garden treasures. For complete list see pages 16 to 20.

PALMS AND CYCADS

Palms are among the most striking plants which may be used for outdoor Southern planting. Their bare, single trunks and huge, arching fronds distinguish them from all other plants. They always attract attention and give a decidedly tropical touch to the grounds. As street and shade trees, and in landscape plantings, they are excellent and worthy of extensive use.

Palm Planting and Our Office

Areca lutescens

COCOS australis. A beautiful Palm, of vigorous growth, with grayish green, curved leaves. Very hardy, and one of the finest for the Gulf Coast country. Each Per 10
2 to 3 feet.....\$1 50 \$12 50
3 to 4 feet.....2 00 17 50
4 to 5 feet.....3 50 30 00

Specimen of Cocos plumosa

Herme

Alba Plena

CAMELLIAS

ARISTOCRATS OF SOUTHERN GARDENS

TWO centuries or more ago, when merchantmen sailed the seven seas and explorers wandered into far-away lands, rare plants were numbered among the treasures sent to the home-land. China—a land of mystery—yielded the beautiful Camellias to the gardens of America and the Continent. “Japonicas,” as we in the South know them, at once became popular and held favor for years. Then their popularity waned, and they disappeared except in the oldest gardens. Now they are resuming their old-time popularity.

Camellias are easily grown in the South, and their rich, glossy foliage and colorful flowers make them unusually attractive. There are many named varieties, but not all are desirable. We have imported from France some of the very best, and from this importation offer only a limited number of varieties. We are sure that our friends and customers will find those listed here extremely desirable, both for color and quantity of blooms.

WHITE

- Alba-plena.** Early. Full, double, wax-like, very regular flowers. Free bloomer.
- Candidissima.** Late. Double. Free flowering. Light green foliage.
- Lilyii.** White, but sometimes spotted with palest pink.
- Mathotiana alba.** Double; very pure white. One of the loveliest.
- Nobilissima.** Double; petals interspersed with yellow stamens.
- Perugiana.** Midseason. Double.

RED

- Auguste Delfosse.** Double.
- Carswelliana.** Double; deep crimson.
- Duchesse de Nassau.** Flowers large, of good form.
- Henri Favre.** Flowers small, with light stripe at end of petals.
- Lady Campbell.** Very double, large flower.
- Mathotiana rubra.** Large, double, red flowers.
- Pompeian Rubra.** A good double, large flower.
- Professor Sargent.** Very double, peony form.

PINK

- Brookleyana.** Double; deep pink, white spots and blotches.
- Carpentri.** Double, peony form; pink.
- Casatti.** Double; deep pink.
- Dixie.** Double; rose-pink.
- Gloire de Nantes.** Large; semi-double; cerise, long yellow stamens.
- Pink Perfection** (Frau Minnie Seidel). Medium size; shell-pink; wax-like. Free flowering.
- Sacco.** Double; beautiful soft shade of rose. Free flowering.
- Sarah Frost.** Late. Very double; deep pink. Free flowering.
- Wilderi.** Double; bright rosy pink. Symmetrical and free flowering.
- Wilder's Rose.** Double; soft rose. Free blooming.

VARIEGATED

- Americana.** Double; flesh color, striped with deeper shade.
 - Bonomiana.** One of the newer varieties of Camellias that is both novel and beautiful. The flowers are white, with red variegations; the petals are loose, with stamens interspersed.
 - Chandleri elegans.** Flowers are double, very large, and of a cherry-red to rose-pink color, splotted with white. The center petals are interspersed with yellow stamens, making a flower beautiful in all its details. All Camellias are beautiful, but this variety is not only beautiful but decidedly “different,” and adds a futuristic touch to a dignified family. The white and pink coloring of the flowers looks well against the shiny foliage. You will also like Chandleri Elegans as a cut-flower.
 - Feastii.** Double; white, striped and spotted with pink.
 - Herme.** Large, peony form. White, with red and pink stripes and splotches.
 - Honneur d'Amerique.** Flowers of both regular and irregular formation. First-row petals imbricated, others small, compact, ruffled. Color a tender pink, delicately dotted or granulated, and often crossed with stripes of vivid rose.
 - Horken.** A recent variety with semi-double flowers; variable in coloring, but white usually predominates, with pink or rose markings. Interesting and attractive.
 - La Reine.** White, striped with carmine.
 - Mme. de Strekaloff.** A variable, peony-flowered, blush-pink with darker blotches and streaks.
 - Marie Louise.** Double; variegated white with red.
 - Stiles' Perfection.** Double; white with small stripes of rose.
- Prices of named varieties.**

SEEDLING CAMELLIAS

Because Camellias do not reproduce themselves exactly from seed, it is impossible to tell what the flowers of seedlings will be like until they bloom. Many seedlings revert to single and half-double types, but there is always a certain percentage of high-class double flowers sometimes surpassing the parent forms. Buying them is a delightful game, in which the purchaser has everything to gain and nothing to lose.

Camellia, Chandleri elegans

Azaleas and Camellias

By H. H. HUME

An effective, useful guide-book for anyone who wants to succeed with either or both of these important shrubs. Every point in their cultivation is carefully explained—time and method of planting, soils, cultivating and mulching, pruning, feeding, frost-protection, pot- and tub-culture, pests and diseases, and instructions for propagating. This book will be of value whether you grow the plants indoors or in the garden.

Ninety pages. Fourteen pictures. \$1.50 per copy

Camellia Seedling

Sarah Frost

FLOWERING *and* DECORATIVE HOUSE PLANTS

House-plants have steadily increased in popularity during the past few years, and today play an important part in interior decorations. The conditions under which they must be grown are very trying, and success cannot be expected unless the plants used are particularly adapted for the purpose. The following list of plants contains many sorts selected with the idea of meeting these unfavorable conditions.

Cardenia veitchi

ARALIA balfouriana. Upright-growing plant; rounded, coarsely toothed leaves, blotched white at margins. Grown in pots or outdoors in south Florida. Each Per 10
4-inch pots.....\$0 50 \$4 50

ASPIDISTRA lurida. Most satisfactory for house conditions. Large, dark green leaves. *variegata.* Leaves striped green and white. Per 100 Per 1000
Both varieties\$10 00 \$70 00

ARAUCARIA bidwilli. A beautiful, coniferous, evergreen tree with strong, pendulous branches from the ground up. Very picturesque and desirable as lawn specimens. Hardy in central Florida and similar latitudes. Each Per 10
4-inch pots.....\$1 00 \$9 00
6-inch pots..... 2 00 17 50

BELOPERONE guttata (Corsican Shrimp Plant). An unusually attractive flowering plant, suitable for pot-culture. Flowers two-lipped, white with purple spots, surrounded with salmon-red, scale-like bracts which lie along four sides of a 3- to 5-inch drooping spike. Flowers almost continuously. Hardy in central and south Florida. 2½-inch pots..... 25 2 00

DIEFFENBACHIA bausei. Suitable for pot-culture indoors or can be grown in the open in south Florida. Leaves a foot or more in length, 3 to 4 inches wide, yellowish green spotted with white. Each
3-inch pots.....\$0 50
4-inch pots..... 1 00
5-inch pots..... 1 50

DRACÆNA godseffiana. An attractive variety with irregularly spotted leaves 5 inches long and 2½ inches wide. 3 inch pots 35
6-inch pots 75

Dracæna massangeana. Leaves green, with lighter stripes in center. Does well under average house conditions. Each Per 10
3-inch pots.....\$0 35 \$3 00
6-inch pots..... 75 6 50

EPISCIA cupreata. An attractive flowering plant. Can be grown in pots or hanging-baskets. Its wrinkled and slightly hairy foliage is tinged with copper. Flowers scarlet.

3-inch pots..... 35 2 50

ERANTHEMUM nervosum (*Dædalacanthus*; Blue Sage). A native in India, this compact, large-leaved plant grows 2 to 4 feet high. Deep blue flowers are borne on dense, bracted spikes. Thrives on light, rich soil with plenty of sun and water.

4-inch pots..... 50 4 50

FICUS elastica (Rubber Plant). This variety has large, roundish oblong leaves. A very desirable house-plant.

6-inch pots..... 1 00 9 00

GARDENIA florida (Cape Jessamine). The well-known Gardenia of the South. Its dark, shiny foliage and white, sweet-scented flowers have made it a favorite for many years.

Field-grown, Balled & Burlapped.

12 to 18 inches..... 75 6 00

18 to 24 inches..... 1 00 9 00

2 to 3 feet..... 1 75 15 00

3 to 4 feet..... 2 25 20 00

veitchi. This fine variety has larger and more loosely built flowers than the original *G. florida*. Being a free bloomer, it has become the popular variety for forcing by northern florists. We feel sure you will like it.

7-inch pots.....\$1 50

8-inch pots..... 2 00

JACOBINIA coccinea (Cardinal's Guard). A beautiful, showy, upright-growing perennial herb with broad, light green leaves to 8 inches long. Plant often attains height of 4 feet. Form similar to scarlet sage but flowers darker red. Fine for the flower border or planted in masses among the shrubbery. Each Per 10
6-inch pots.....\$0 50 \$4 50

LIRIOPE muscari variegata. Very similar to *Ophiopogon*, both in growth habit and cultural requirements. The leaves are somewhat shorter and the flowers lilac.

Medium clumps..... 35 3 00

Dracæna massangeana

Sansevieria

OPHIPOGON jaburan vittata. In addition to its usefulness as a ground-cover and border plant, this variegated or striped form is a very satisfactory pot- or window-box plant. Flowers white, slightly drooping. Each Per 10
Clumps.....\$0 35 \$3 00

PANDANUS veitchi. One of the finest decorative plants, with sword-like, sharp-pointed, green foliage; striped with creamy white.

4-inch pots..... 75 6 50

PEPEROMIA obtusifolia (Baby Rubber Plant). A popular, indoor plant. Compact, with leathery, dark green, oval leaves.

2½-inch pots..... 20 1 50

3-inch pots..... 35 3 00

sandersi. Closely resembling *Obtusifolia* but with attractively striped leaves.

2½-inch pots..... 35 3 00

SAINTPAULIA ionantha and *Blue Boy* (African Violet). Satisfactory as a pot-plant, in window-boxes, or in the open if planted in shady spots. Deep violet. Hardy in south Florida. 2½-inch pots..... 25 2 00

SANSEVIERIA. Leaves sword-shaped, dimly variegated with transverse bands of dark green and grayish white. Sansevierias are probably better adapted for growing indoors than any other plant.

laurenti. Has creamy yellow markings or bands along the leaf-margins.

4-inch pots..... 50 4 50

Prices on larger sizes quoted on request.

POINSETTIAS are among the most colorful subjects for use as Christmas decorations. 25 cts. to \$3.

If you have available space, by all means have a garden of Azaleas. See pages 16 to 20.

GLEN SAINT MARY ROSES

To New Customers Only:

We are not talking to our thousands of old patrons who have made their gardens with Glen Roses—they know all this already. But you talk to them—ask them what they think of Glen field-grown, budded Roses in the long run, year after year. We are pretty sure of the answer; we wouldn't have mentioned it otherwise.

The earlier you order, the better your chance of getting what you want. Shipping begins about the middle of November.

Abbreviations after listed varieties refer to class or type: T., Tea; HT., Hybrid Tea; HP., Hybrid Perpetual; HG., Hybrid Gigantea; N., Noisette; Ben., Bengal.

The American Rose Society

We strongly recommend this organization of Rose-growing people. The dues are \$3.50 per year. Members receive an elementary textbook on growing Roses, the American Rose Annual, and the bi-monthly American Rose Magazine.

Send your subscription with check or money order to us, or to the Secretary, American Rose Society, Harrisburg, Pa.

BUSH *and* CLIMBING ROSES

All Bush and Climbing Roses not otherwise listed are 45 cts. each, \$4 for 10, and \$35 per 100. Double these figures for bushes dug with earth around the roots and tops left on (Balled & Burlapped). B&B Roses may be moved safely during the summer months or at any time when bare-rooted plants cannot be used. No. 1 following some of the varieties means they have proved worthy and dependable.

PINK BUSH ROSES

- Anna de Diesbach.** HP. Large, fragrant flowers of a beautiful shade of pink. Buds are very fine and produced on long stems. Somewhat like Paul Neyron.
- Antoine Rivoire.** HT. Delicate silvery pink, shading to peach in center. Flowers medium size, double. Bush seldom mildews and is free bloomer in spring and fall.
- Baby Rambler.** Poly. No. 1. Dwarf pink cluster Rose. For hedges and borders.
- Betty Uprichard.** HT. Long-pointed, coppery red buds.
- Dainty Bess.** HT. Distinctly different type. Flower $3\frac{1}{2}$ to 4 inches across, single, broad-petaled, with crinkled edges, delicate rose-pink. The prominent stamens remind one of Cherokee. 65 cts. each, \$6 for 10. See illustration on page 29.
- Duchesse de Brabant.** T. No. 1. Fine old pink variety well known by everyone.
- Hilda.** HT. A two-toned pink Rose of fine form and large size. 65 cts. each, \$6 for 10. See illustration on page 28.
- Minnie Francis.** T. No. 1. Deep pink, very open flowers. Strong grower.
- Mme. Lambard.** T. No. 1. Strongest growing pink in our collection. Clear light pink to deeper tint. Can be grown in tree-form.
- Mrs. Charles Bell.** HT. No. 1. Lovely shell-pink. Vigorous grower.
- Paul Neyron.** HP. No. 1. Immense, dark pink blooms on very long, thornless stems.
- Pink Killarney.** HT. Large, almost single, delicate pink blooms, opening wide.
- Pink Maman Cochet.** T. No. 1. Nicely formed buds and flowers of pale pink, deeper at center. Fine for cutting.
- Pink Radiance.** HT. No. 1. It blooms continuously.
- President Herbert Hoover.** See page 29.

PINK CLIMBING ROSES

- Anemone (Pink Cherokee).** Attractive hybrid of white Cherokee.
- Belle of Portugal.** HG. Extremely large flowers of lovely pink tinged with salmon.
- Climbing Pink Maman Cochet.** T. No. 1.
- Climbing Pink Radiance.** HT. No. 1

RED BUSH ROSES

- Ami Quinard.** HT. A lovely deep, rich velvety crimson-maroon, introduced to America in 1930. Blooms of medium size, fragrant, and last for several days. Plant vigorous and blooms freely. 65 cts. each, \$6 for 10. See illustration on page 28.
- Black Prince.** HP. No. 1. Produces large, dark crimson flowers, nearly black at times. Very strong grower.
- Etoile de France.** HT. No. 1. A truly excellent Rose, having large, very fragrant crimson flowers.
- Etoile de Hollande.** HT. One of the reddest of red Roses. Good-sized blooms and buds borne on long stems. Intermittent bloomer during summer.
- Freiherr von Marschall.** T. No. 1. Well-formed, deep red flowers; good foliage.
- General Jacqueminot.** HP. No. 1. Large, velvety deep red, sweet-scented blooms. Upright grower.
- His Majesty.** HT. No. 1. One of the newer Roses. Blooms of good size, fragrant, dark crimson, deepening toward edges. Abundant bloomer. Good stems and growth habit.
- Kirsten Poulsen.** Poly. Bright scarlet, single, slightly fragrant blooms borne in clusters on long stems. It is a vigorous, bushy grower, very hardy, and blooms all season.
- Louis Philippe.** Ben. No. 1. Good dark red shrub Rose. Continuous bloomer.
- Red-Letter Day.** HT. A brilliant scarlet, nearly single Rose that quickly opens flat. Satisfactory grower and makes beautiful mass effect in the garden.
- Red Radiance.** HT. No. 1. Deep rose-red. Lasts well. Fine for cutting.
- Texas Centennial.** \$1 each. See page 29.
- Ulrich Brunner.** HP. Produces fragrant flowers of bright red, changing to carmine. Plant is disease-resistant. Early summer bloomer easily adapted to pillar training.

RED BUSH ROSES, continued

- Vaterland.** HT. Bud and flower large, opening full, double; handsome dark red with coppery reflexes. Foliage bronze and quite disease-resistant. Continuous bloomer all season. A thoroughly fine Rose.
- Virginia R. Coxe (Gruss an Teplitz).** T. No. 1. Startling red, sweet-scented blooms.

RED CLIMBING ROSES

- Climbing American Beauty.** HW. No. 1. Similar to bush. Good June performer.
- Climbing Etoile de Hollande.** CHT. A strong climbing form of the famous bush Rose.
- Climbing Red Radiance.** CHT. Vigorous, climbing sport of Red Radiance.
- Climbing Souvenir of Wootton.** CHT. This bright red variety is one of the best of its class. Strong bush and a free bloomer.
- Paul's Scarlet Climber.** HW. Startling brilliant scarlet blooms which seldom fade. Profuse bloomer in spring. Fine for covering fences and walls.
- Ramona (Red Cherokee).** Excellent companion for white Cherokee.
- Reine Marie Henriette.** CT. One of best red climbers we know. Bright red, pointed buds of good size. A vigorous grower.

WHITE BUSH ROSES

- Frau Karl Druschki.** HP. No. 1. Excellent white variety sometimes called White American Beauty.
- Kaiserin Auguste Viktoria.** T. No. 1. Free and regular bloomer from early to late. Pure white, on long stems. One of the most satisfactory southern sorts.
- Marie van Houtte.** T. No. 1. The general color is white, but tinted at center with pale lemon and on outer petals with pink.
- White Killarney.** HT. Long-pointed buds and semi-double, open flowers. Most attractive.
- White Maman Cochet.** T. No. 1. Closely resembles pink Maman Cochet in all but color. Excellent for cutting. White, tinted pink on outer petals, pale yellow centers.

Hilda. 65 cts. each

WHITE CLIMBING ROSES

- Climbing White Maman Cochet.** CT. No. 1. Same as bush type, except growth habit.
Cherokee. No. 1. Rampant-climbing, single, pure white Rose, with prominent yellow stamens. Valuable for covering fences and dwellings during the entire season. Spring bloomer.
Devoniensis. CT. No. 1. Probably the strongest-growing Tea in our collection. Creamy white, with delicately shaded pink center. Long lived and most satisfactory.
Lamarque. N. Free-flowering, climbing white Rose with tint of pale yellow. Very fragrant blooms in clusters.

Ami Quinard. 65 cts. each

YELLOW BUSH ROSES

Yellow, Copper- and Orange-tinted

- Alexander Hill Gray.** T. Pale lemon-yellow, darker toward center; well-formed and fragrant. Growth moderate; continuous bloomer. Disease-resistant.
Etoile de Lyon. T. No. 1. Golden yellow, full, double flowers.
Golden Ophelia. HT. No. 1. Bud and bloom medium size, golden yellow in center, paling toward outer petals; delicately fragrant. Long, strong stems. One of the best yellows for the South.
Isabella Sprunt. T. No. 1. Related to Safrano. Popular since 1863. Produces large, pale yellow blooms very freely and continuously.
Lady Hillingdon. T. No. 1. Has slender, pointed buds and exquisitely cupped flowers of apricot-yellow. Upright habit. Disease-resistant. Free continuous bloomer. One of the best.
Luxembourg. HT. No. 1. An extremely satisfactory Hybrid Tea Rose for Southern gardens. The flowers are rich apricot-yellow, shaded with copper, and lighter yellow at the tips of the petals.
Roslyn. HT. A fine, double flower of deepest yellow on a branching plant.
Safrano. T. No. 1. Well known and liked. Saffron and apricot buds and semi-double flowers. Disease-resistant.
Sunburst. HT. Another fine Rose for the South. Medium-sized, long-pointed buds open to double and full cupped blooms of clear yellow, with golden orange tints in center. Spreading; almost thornless.
Talisman. HT. Presents unusual combination of orange and copper tones, suffused with pink. Truly multicolored. Flowers are high centered, double, and quite fragrant. Does best in partial shade in this latitude.

YELLOW CLIMBERS

- Banksia Lutea.** Unique. In spring the drooping branches are covered with tiny fragrant rosettes.
Climbing Perle des Jardins. T. No. 1. Most satisfactory climbing yellow Rose in the South.
Fortune's Double Yellow. N. Semi-double orange-yellow flowers flaked with red, borne along the stems; June-July.
Marechal Niel. N. No. 1. D deservedly famous old-timer. Full yellow flowers. Sturdy.
Mermaid. H.Brac. Flowers 5 to 6 inches across, single, open, fragrant, pale creamy yellow, with amber stamens. Foliage deep green. Disease-resistant. Strong grower; profuse bloomer in fall, fair in summer. 75 cts. each, \$7 for 10. See illustration.
Reve d'Or. N. Closely resembles Safrano but has greater substance. Holds foliage well.
Solfatare. N. Flowers sulphur-yellow, large, double, and well formed. Free bloomer; fine foliage

Mermaid. 75 cts. each

DAINTY BESS HT.

Although single, this is one of the loveliest flowers of the whole Hybrid Tea family. It is 3½ to 4 inches in diameter and the five petals have fimbriated edges, giving the flower an artistically informal appearance. The color is soft rose, and a mass of wine-colored stamens adds to its charm and reminds one of Cherokee. The flowers come in clusters on strong, branching plants and are freely produced all season. 65 cts. each.

Dainty Bess. 65 cts. each

TEXAS CENTENNIAL HT.

Plant Patent No. 162

A sport of President Herbert Hoover with all of Hoover's good points; in fact, both plant and flower are like Hoover except in color. The flowers of Texas Centennial are vermillion-red, gradually changing to deep rich pink. \$1 each, \$2.50 for 3, \$10 per doz.

©

Texas Centennial. \$1 each

President Herbert Hoover. 45 cts. each

PRESIDENT HERBERT HOOVER HT.

One of the strongest growing of the Hybrid Teas. Its flowers are produced on unusually long stems, and as the blooms come singly it is an ideal cut-flower. The flowers are a mixture of pink, yellow, and flame tints and are spicily fragrant. 45 cts. each.

AUSTRALIAN ROSES

Since the introduction of this class of Roses several years ago, they have become widely and favorably known. Even the most critical Rose-growers acknowledge their good qualities. From the larger number introduced we have selected some of the most desirable, basing our selection on quality of bloom, color, and growth of plant. We know these will give entire satisfaction to Rose-lovers who are so fortunate—and wise—as to plant them this year. Opposite is a picture of an Australian Rose on a pillar; there should be many more used in the South.

Australian Roses, \$1 each, regardless of number ordered

Countess of Stradbroke. CHT. (Climber.) Magnificent, deep velvety crimson. Bud and flower large, lasting, moderately fragrant. Continuous blooming habit.

Daydream. CHT. (Climber or Pillar.) Blush-pink frilled petals.

Flying Colours. HG. (Climber.) Brilliant red blooms of startling vividness.

Harbinger. HG. (Climber.) Clear, soft pink. Beautiful effect.

Lorraine Lee. HG. (Bush.) A shrubby plant with orange-pink flowers. Everblooming.

Milkmaid. HN. (Climber.) Small, creamy white flowers, tinted fawn.

Mrs. Philip Russell. HT. (Pillar.) One of the most distinctive of the Australians. Deep red, with black shading. Medium-sized flowers, semi-double, somewhat fragrant. Unusually fine foliage.

Nora Cuninghame. CHT. (Climber.) Large, semi-double flowers of clear pink.

Queen of Hearts. CHT. (Climber.) Lovely, radiant pink variety.

Salmon Spray. Poly. (Bush.) Huge clusters of large salmon-pink flowers.

Scorcher. CHT. (Pillar.) Stunning flowers of gorgeous scarlet.

Sunday Best. CHP. (Bush.) Mammoth, saucer-shaped, red flowers with white centers.

Sunny South. HT. (Bush.) Blooms constantly and profusely, and produces a most pleasing effect if flowers are not cut. Buds and blooms of good size, semi-double, pink, with yellow toward center.

Sweet Seventeen. HP. (Bush.) Bud ovoid and of fair size; flower medium size, semi-double (almost single, like Cherokee), lasting, fragrant, rich light pink, borne on short stem. Foliage light green, crinkled. Rather dwarf grower and beautiful if left in the garden. Free bloomer. Limited supply.

Daydream on pillar

General Rose Information

PLANTING ROSES

The planting season in the South is from December 1, or as soon as the plants are dormant, through the winter and spring months to about April 15. When the plants are received, it is well to set them in buckets of water overnight, if they have been delayed in transit, or bury them completely for a day or two in moist soil. They are already pruned for planting, but any broken roots should be trimmed off. Our grafted plants should be set same depth as grown, indicated by soil-marks.

Space them 2 to 2½ feet apart. Spread the roots out carefully, fill in with good soil mixed with bonemeal, pack the earth tight about the roots, leave a basin, and water well.

SOILS and PREPARATION

Soils in the South are variable, perhaps in some districts more so than in other parts of the country; hence it is difficult to lay down general rules for soil-preparation. Locations under the shade of trees, or where the ground is filled with tree-roots, should be avoided. Wet soils should be drained. The Rose delights in a moist soil, but standing water or a soil completely filled with water for a period of time is certain to prove harmful. Clay lands need little preparation, except to enrich them and make them less compact and more friable. The addition of 2 to 3 inches of peat moss, good muck, or woods-mold will help greatly. These can be spread over the surface and spaded in. Stable manure, well rotted, is also good. Sandy soils can be improved by adding clay wherever possible and with it peat moss, woods-mold, or stable manure. Closely planted beds may be prepared by digging out 15 inches deep, and filling in with 4 to 6 inches of good clay and finishing off with 9 inches of a well-mixed soil, composed of garden soil or woods-mold, stable manure, and one to two pounds of bonemeal for each plant. It is best to make up the beds two to three weeks before planting.

FERTILIZING and CARE

Thorough preparation of the soil before planting will take care of the fertilizing problem for some time, but as Roses are gross feeders, it is necessary to keep them supplied with an abundance of plant-food. Stable manure may be used, liberally scattered on the surface as a mulch, and good, well-balanced commercial fertilizer may also be used from time to time. A mulch of 3 to 4 inches of leaves or partly rotted

leaves and leaf-mold is excellent, during the summer. In dry weather, water freely.

Tea Roses do not require very severe pruning. Prune in September and October for fall and winter bloom; in late February and March for the spring crop of flowers. Thin out small and poorly developed wood. Cut Hybrid Perpetuals severely, leaving only 3 to 4 inches of the old canes. Climbers should be pruned sparingly.

Shoots sometimes come up from the stock below the graft union and take the food-supply to such an extent that they destroy the Rose top. The leaves on these shoots generally have seven leaflets and are quite different in appearance. They should be removed by digging down to the point of union with the stem and cutting them off smooth and clean.

PESTS and DISEASES

All common Rose diseases and insects can be controlled with Triogen, which is put out by Rose Manufacturing Co., Philadelphia, Pa. We have found it very effective if used according to directions. Triogen was officially adopted for the exclusive protection of the garden of 6000 Roses at the Century of Progress, Chicago World's Fair. Fungtrogen is another preparation made by the same company, primarily for black-spot, and may be profitably used where this is the only condition to be combated.

Black-spot appears as irregular dark areas on leaves and stems. Affected leaves turn yellow and drop off.

Massey Dust, sometimes called Combination Dust or "9-1-1," can also be used for general clean-up if preferred. Whether spray or dust is used, be sure to reach the underside of leaves as well as top. Because this is easier to do with a spray, many growers prefer it.

Important. Both dusts and sprays should be applied before rains in so far as possible if maximum results are to be obtained. Dusting should be done in early morning or evening when the air is most likely to be still.

Prevention of Rose-Troubles is Better Than Cure. Protect the bush before disease reaches it!

Besides the Australian Roses, there are other well-known varieties which can be grown as Pillars: Kaiserin Auguste Viktoria, Frau Karl Druschki, Mme. Lambard, Paul's Scarlet Climber, Cherokee. Indeed, almost any of the climbers or vigorous bush sorts may be readily adapted.

Hemerocallis

HEMEROCALLIS • Day-Lily

These decorative perennials are rapidly growing in favor and well deserve their popularity. The flowers are wonderfully beautiful, many of them fragrant; the colors range through all the shades of yellow, from the palest lemon to a deep tawny reddish orange. There are tall varieties as well as low-growing ones, and, if carefully chosen, a succession of bloom may be had from early April through August.

We strongly recommend coming to see these lovely flowers during their blooming period and choosing for yourself

- Apricot. A low-growing variety with fragrant, clear orange flowers. May to August.
- Aurantiaca. Fine variety from Japan, with sweet-scented, deep orange flowers. Grows 2 to 3 feet high. June to August.
- Citrina. The flowers of this variety are quite long, a pale sulphur-yellow, and notably fragrant. Blooms are at their best in the late afternoon and early evening. June and July.
- Dumortieri. Flowers orange color, shaded much darker on outer side of petals. Blooms early, even in late April and May. About 1 foot high.

- Florham. One of the finest of the older varieties. Fragrant golden yellow flowers with a raised midrib and curving, fluted petals. May through August.
- Fulva (Tawny Day-Lily). Large flowers of dusty orange, with darker markings of reddish orange; light midrib. Tall; late bloomer.
- Gold Dust. Golden yellow flowers with narrow, curving petals. Low growing. Early.
- Kwanso. Very large, double, orange-copper flowers. Tall. Late.
- Sovereign. Fragrant flowers of clear light yellow; outer petals brownish. Medium height. April to August.

Small clumps	Each	Per 10
Medium clumps	\$0 25	\$2 00
Large clumps	40	3 50
	60	5 00

BAMBOOS

There are no more beautiful plants than the Bamboos. The long, willowy canes and fine foliage give a delicate, pleasing effect. Under suitable climatic conditions they will grow on very poor soil, if well supplied with plant-food. Good drainage they should have, and moisture in abundance.

- Arundinaria japonica (Bambusa metake). Hardest Bamboo, quickly growing 15 feet high. Large, handsome foliage. Spreads rapidly.

Bamboos

- Bambusa argentea. Vigorous grower for hedges and screens. Handsome foliage and canes which will grow 25 feet.
- Bambusa argentea striata. A similar variety with green canes, striped with yellow near the base. The leaves are also variegated with whitish stripes.
- Bambusa disticha. A very handsome clump Bamboo, with fern-like leaves rarely taller than 15 feet.
- Bambusa verticillata. Upright clump Bamboo, with yellow and green striped canes about 30 feet high.
- Phyllostachys aurea (Bambusa aurea). Rapidly spreading, very hardy Bamboo, with bright yellow canes. Very graceful and hardy.

Prices of Bamboos.	Each	Per 10
Small clumps, 6 to 10 canes	\$0 50	\$4 00
Strong clumps, 12 to 18 canes	75	6 00
Extra-strong, 20 or more canes	1 75	15 00
Specimens	2 50	and up.

VINES

Vines add a great deal to the beauty of the home and its surroundings. The South is fortunate in the number of beautiful flowering vines which will grow to perfection in a very short time.

- ALLAMANDA hendersonii. Evergreen. Large, golden yellow flowers. Adapted to central and south Florida.
- BIGNONIA chamberlayni. Evergreen. Hardy vine with bright yellow flowers in early spring.
- radicans (Trumpet Vine). Leaves dark green. Flowers brilliant orange in summer. Very hardy.
- speciosa. Evergreen. Glossy leaves and large, lavender-blue flowers in clusters.
- venusta (Flame Vine). Evergreen. Profusion of bright reddish orange flowers. Very showy. Tender.
- BOUGAINVILLEA glabra sanderiana. Evergreen. Vigorous grower; large masses of purple flowers.
- Crimson Lake. A most striking variety with bright crimson flowers. Tender.
- ENGLISH IVY (Hedera belix). Evergreen. Makes an excellent covering for walls and tree-trunks; hardy.
- FICUS repens (Evergreen Climbing Fig). Finest of all for covering buildings and walls.

Bignonia radicans

- HONEYSUCKLE, Trumpet (Lonicera sempervirens). A beautiful, strong-growing vine with showy scarlet flowers.
- JASMINUM pubescens. Evergreen. Beautiful foliage and white, star-shaped flowers.
- simplicifolium. Evergreen. Rapid-growing vine with large leaves and white, star-shaped flowers.
- PANDOREA jasminoides. Foliage dark green. Flowers trumpet-shaped, white suffused with pink.
- RHYNOSPERMUM jasminoides. Evergreen. Beautiful, dark, shiny leaves and fragrant, white, star-shaped flowers. Hardy.
- THUNBERGIA grandiflora. The showy, dark blue, tubular flowers are borne in thick racemes. Tender.
- WISTERIA, Purple. Strong-growing, hardy, deciduous vine. Flowers in large clusters in spring.
- White. Produces large clusters of delicately scented white flowers.
- YELLOW JESSAMINE (Gelsemium sempervirens). A slender, rapid-growing evergreen vine. Flowers yellow, fragrant, produced in profusion during the spring months.

Prices of all Vines.	Each	Per 10
Small plants	\$0 35	\$3 00
Medium plants	50	4 00
Strong plants	1 00	9 00
Extra-strong plants	1 25	10 00
Special	1 50	and up.

CONIFEROUS EVERGREENS

These plants make beautiful individual lawn specimens. The different colors—yellow, green, dark green, and blue-green—give striking effect when planted in masses, either when groups are made up of a single kind, or of a number of different kinds. They make an excellent background for other shrubs and are of great value in foundation plantings. For hedges they are unsurpassed. In planting for a hedge, they should be given more distance than other hedge plants—4 to 5 feet apart is not too much. As plants for porches or porch-steps, they are very satisfactory. They are hardy and long lived. The conifers grown at Glen Saint Mary and offered to our customers have been tested for many years, and include the finest material for Southern gardens.

Arborvitae aurea nana A. pyramidalis A., Blue-Green A., Rosedale

GROUP I

JUNIPERUS conferta (Shore Juniper). Spreading, prostrate Juniper with light green foliage, rather feathery; will not turn brown in winter. Will do well on sandy soil or clay.

pfitzeriana (Pfitzer's Juniper). This Juniper forms a low, flat, wide-spreading, irregular head, clothed with bluish green foliage. It is one of the most interesting and beautiful conifers, highly resistant to drought and almost universally successful.

sabina cupressifolia (Creeping Juniper). A Juniper of trailing or creeping habit; bluish green; very handsome. Excellent for bordering walks, for planting on sloping ground, or for use as a ground-cover.

PODOCARPUS macrophylla maki. Sheared specimens. Beautiful evergreen, upright, branching shrub or small tree with rather broad leaves, light green when young, dark green when mature. Excellent for hedges, screens, specimens, or for the shrubbery border.

Prices of Group I.	Each	Per 10
8 to 12 inches.....	\$1 00	\$7 50
12 to 18 inches.....	1 50	12 50
18 to 24 inches.....	2 25	20 00
2 to 3 feet.....	3 00	27 50

GROUP II

ARBORVITAE aurea nana. Compact, rounded head and handsome, greenish golden foliage. Sizes up to 4 feet.

Bonita. This is a beautiful rich green variety, dwarf or of slow growth. It is cone-shaped and rather broad. Sizes up to 3 feet.

compacta. A fine, dark green variety of compact, conical growth. Sizes up to 4 feet.

globosa. A dense, dwarf, dark green form of Occidentalis Arborvitae that grows like a round ball. It is a good plant for setting in front of other evergreens, for making a low hedge, or for tub or pot specimens. Sizes up to 2 feet.

RETINOSPORA pisifera argentea. Very dwarf. Green, tipped with silver. Sizes to 2½ feet.

Prices of Group II.	Each	Per 10
8 to 12 inches.....	\$0 75	\$6 00
12 to 18 inches.....	1 25	10 00
18 to 24 inches.....	2 00	17 50
2 to 3 feet.....	2 75	25 00
3 to 4 feet.....	3 75	35 00

GROUP III

ARBORVITAE aurea conspicua. Deep yellow to golden color, often varying to green. Tall, compact, and upright. Sizes up to 6 feet.

Blue-Green. This is a handsome Arborvitae with bluish green foliage. A strong grower and soon makes fine, large, beautiful specimens which retain their good appearance, even when old. Sizes up to 6 feet.

pyramidalis. A compact, pyramidal Arborvitae, reaching a height of about 15 feet. Bright green, and holds its color well. Very fine. Sizes up to 6 feet.

Rosedale. Of compact, rounded, symmetrical form, with very dense head. The foliage is dark, bluish green and very handsome. Sizes up to 5 feet.

RETINOSPORA ericoides. This is a beautiful conifer, dense and compact in growth. Naturally it is an upright grower and may be pruned in very narrow, columnar shape. The foliage is a dark bluish green. Not particular as to soil. Sizes up to 8 feet.

pisifera aurea. A showy evergreen of dense growth; new shoots of a rich golden color. Dwarf. Sizes up to 4 feet.

squarrosa veitchii. A rapid-growing variety with silvery blue foliage. It is a handsome, distinct conifer, reaching a height of 15 to 20 feet, and shears well. Sizes up to 6 feet.

JUNIPERUS communis. This variety is dark green, upright in form, with slender, recurving branches. Can be pruned in any desired shape. Sizes up to 6 feet.

excelsa stricta (Greek Juniper). A dwarf, narrow, compact, upright Juniper that does well under widely different conditions. Its grayish green color is very pleasing. Fine for foundation work. Sizes up to 6 feet.

japonica sylvestris. This is a very beautiful Juniper that grows well in the Lower South. The needle-shaped leaves are steel-color, while the smaller, scale-like leaves are dark green. It is narrow and upright in habit. Well adapted to conditions in the Lower South. Sizes up to 8 feet.

virginiana. The Red Cedar is a tree with a dark green head and spreading or upright branches. It grows rapidly and is adapted to a wide range of soils. It does well either in full sun or in partial shade, and is one of the most dependable of all the conifers.

PODOCARPUS macrophylla maki and **sinensis** (Japanese Yew), Natural growth. Beautiful evergreen, upright, branching shrubs or small trees with rather broad leaves, light green when young, dark green when mature. Excellent plants for hedges, screens, specimens, or for the shrubbery border.

CEDRUS deodara (Indian Cedar). Of pyramidal form, reaching large size. Foliage a beautiful shade of bluish green. When the new foliage is opening in spring, the trees are particularly handsome. This tree is well adapted to the Southern States. It takes the place of Colorado Blue Spruce in Southern plantings, is more open and graceful in habit, but similar in coloring. It should be planted only on well-drained soils, as it may be killed by too much water.

Pfitzer's Juniper

GLEN SAINT MARY NURSERIES COMPANY
Citrus Nurseries: WINTER HAVEN, FLA.

Signature of Customer _____

[illegible]

THIS SPACE FOR CUSTOMER'S REMARKS OR INSTRUCTIONS.

Terms of Business

Location. General Office and Nurseries at Glen Saint Mary, Baker County, Florida, on Seaboard Airline Railway, and State Road No. 1, 30 miles west of Jacksonville. Office and Citrus Nurseries at Winter Haven, Polk County, Florida. Visitors are always welcome.

Applying Prices. Orders for five (5), fifty (50), and five hundred (500) plants of one variety command the 10, 100, and 1000 rates respectively.

Cash or satisfactory reference must accompany all orders for immediate shipment unless the party ordering has an account. On orders booked in advance of the shipping season, 25 per cent down, with the balance due when the shipping season opens, will be required.

Be sure to state clearly when ordering how you wish shipment made—Parcel Post, Express, or Freight. Lacking this information, we will use our best judgment as to method of forwarding. On orders for shipment by Parcel Post, add 25 per cent to the list price to cover cost of packing and postage. Please use our order blanks; additional ones will be mailed upon request.

Shipping and Planting Season. From the middle of November to March for bare-rooted plants.

Substitution. It is our desire to furnish stock exactly as ordered. On orders for commercial planting substitution of varieties will not be made without permission from customer. On small orders, items which we are unable to supply will be omitted unless we are instructed to substitute.

We guarantee all stock sent out to be well rooted, well grown, true to name, properly packed, and shipped according to instructions. Our liability under the foregoing guarantee is limited in amount to the original price received. There shall be no nursery stock sold under a guarantee to live, except with the understanding that it will be replaced within one year from date of sale if it dies, at not less than 50 per cent of the purchase price, which shall be considered as insurance.

Claims. If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within 10 days after the receipt of goods. Our responsibility ceases upon delivery of nursery stock in good condition to public carrier.

LARGE-SIZED TREES AND SHRUBS FOR IMMEDIATE RESULTS

In the foregoing pages of our Catalogue we have listed the regular sizes of trees and plants. Very frequently our customers are interested in large-sized specimens with which to secure quicker effects from their plantings. We are able to furnish these in a number of different sizes and varieties, and we are prepared to move them with large balls of earth about the roots. We shall be pleased to furnish descriptions and prices upon request, stating size and kind desired.
